

DOOR FEATURES

SURFACE TEXTURE

Our superior oak and mahogany textured skin technology with “High Definition Panel Embossments” provides an authentic wood finish look. We provide the real feel and look of a wood textured surface without the disadvantages that natural wood doors come with (i.e.: fading, rotting, warping, etc.).

COMPOSITE RAILS ON ALL EDGES

Our fiberglass doors have composite (PVC) rails that surround the parameter of the panel making them 100% water proof. This prevents them from rotting and warping like other fiberglass, steel or wood doors. This is one of the reasons why we offer lifetime warranty!

LVL LUMBER COMPONENTS

LVL (Laminated Veneer Lumber) is the strongest man-made wood material. We created the world’s first PVC LVL cap wrap with a tongue-in-groove rail lock system giving our doors a solid frame structure with complete moisture barrier.

DOOR CORE

Our door core is made of high-density CFC-free polyurethane foam, providing six (6) times the insulation of a traditional wood door. Another advantage of a polyurethane door core is superior sound proofing.

PANEL DESIGN

Both our EXECUTIVE panel and RECESSED panel doors easily meet both the demanding contractor and customer concerns. The elegantly detailed architectural panels feature deep shadow lines that add to any home’s strong curb appeal.
